

ABSTRACT OF THE DISCLOSURE

5 A web television includes a display, a tuner, an
internet module, and a PIP module. The tuner is arranged to
select television video for display on the display and to
select television audio for display by a speaker of the web
television. The internet module is arranged to supply
internet video for display on the display and to supply
internet audio for display by the speaker of the web televi-
sion, and the internet video and audio are derived from
internet communications between the web television and
internet content providers. The PIP module is arranged to
provide a PIP area within a main area of the display. The
internet video and the television video may be swapped
between the PIP area and the main area of the display, and
the speaker of the web television may be swapped between the
internet audio and the television audio.
